

Meter Connection Kit MCK20

METER CONNECTION KIT, MCK20

The AVG Meter Connection Kit MCK20 is used to safeguard against back pressure and Back Siphonage in low hazard applications.

The MCK20 Meter Connection Kit is suitable for horizontal or vertical installations in domestic low hazard applications.

Each Kit includes a lockable ball valve, inline dual check valve and a 90 degree elbow. The meter, nuts and tails are not supplied with the kit, a suitable water meter will need to be purchased separately.
