SOLAR CONTROL KIT

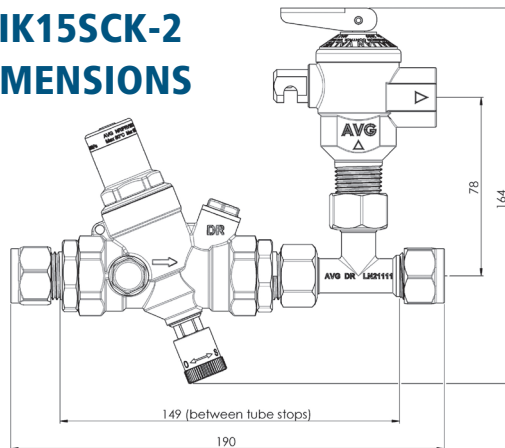

The new AVG Solar Control Valve is a cold water inlet combination valve for a roof mounted solar hot water heater. The valve assembly is installed in a convenient position for ease of operation.

This innovative cold water inlet combination incorporates an NRI/PRV, strainer and ECV all in one neat package designed with the installing plumber in mind.

The Solar Control Valve requires no thread sealant or tape to assemble and has 15mm compression inlet and outlet connections.

QIK15SCK-2 DIMENSIONS
